

Smilehouse Workspace is a packaged e-commerce software for both business-to-consumer and business-to-business solutions.

Workspace has a ready-made integration to SAP Business One. This enables building advanced and integrated e-commerce solutions quickly and easily.

Integrated e-commerce for **SAP Business One**

About SAP Business One and Workspace

- SAP Business One is an integrated, affordable business management solution designed specifically for small and midsize businesses. More info: www.sap.com/solutions/sme/businessone/
- Workspace is a packaged e-commerce software for creating integrated web shops and online stores. More info: workspace.smilehouse.com

Integrated e-commerce

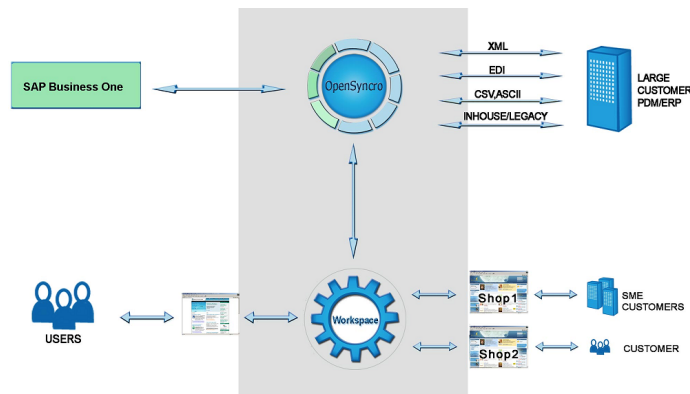

- Modern e-commerce systems are more and more frequently integrated to other IT systems.
- These systems include both merchants back-end systems (e.g. ERP, financial, warehouse) and buyers systems (PD, purchase orders)
- The goal is to enable more efficient e-commerce processes, scalability, partner integration and future growth.
- When choosing e-commerce add-on for SAP Business One, Smilehouse Workspace is the right choice.

Benefits for SAP Business One Customers

- Workspace is a packaged e-commerce software:
 - Fast and easy implementation
 - Features for b-to-b and b-to-c
 - Tested data security
 - Technical support by Smilehouse
 - Continuous development by Smilehouse
- Ready-made integration to SAP enables:
 - Tested integration process
 - Low implementation and integration costs

Example Business Case

- Workspace is used to build a web shop serving both resellers and consumers.
- Product, customer and pricing data can be automatically moved from SAP to Workspace. Order data can be automatically moved from Workspace to SAP.
- The integration also enables sending product data in XML/CSV format to selected business customers.

Technology behind integration

- Smilehouse Workspace and SAP Business One are integrated using Smilehouse OpenSynco, an integration toolkit.
- OpenSynco has a ready-made Connector Pack that enables building batch transfer integrations to the SAP Business One system.
- Using the Connector Pack, setting up OpenSynco data transfer pipes between Smilehouse Workspace and SAP can be done quickly and easily.
- Both Workspace and OpenSynco can be installed on the same server.
