

OpenSyncro Connector Pack (v1.0) ProCounter enables loading sales orders to ProCounter.

Default configuration includes XSLT to transform data from Smilehouse Workspace to ProCounter format.

The XSLT can be modified to transform data to ProCounter XML format from any desired format.

Connector Pack for ProCounter

About ProCounter and Workspace

- ProCounter is an online ERP service.
More info: <http://www.procounter.com/>
- Workspace is a packaged e-commerce software for creating integrated web shops and online stores.
More info: <http://workspace.smilehouse.com>

Basic Connector Pack features

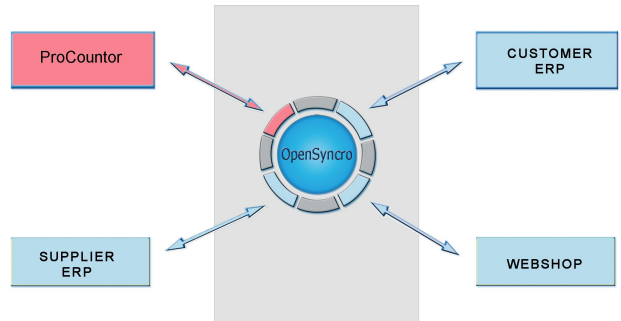

- Connector Pack enables building batch transfer integrations to ProCounter systems using provided OpenSyncro scripts and/or components.
- The basic installation includes XSLT for transforming Workspace order data to ProCounter format.
- Modifying the XSLT enables building custom transformations from any desired format.
- Using the Connector Pack, setting up OpenSyncro data transfer pipes between Smilehouse Workspace e-commerce software and ProCounter is easy.

Target group

- Companies that use ProCounter and need to build integrations to other enterprise applications.
- IT consultancies providing integration solutions to ProCounter and/or Smilehouse Workspace customers.

Business Case

- For example OpenSyncro could extract product data from suppliers systems and load this to both web shop and corporate customers ERP systems.
- Purchase orders from web shop and corporate customers can be loaded to ProCounter.

Configuration and deployment

- Usually it takes 2 working days to set up sales order transfers.
- When building integration to Smilehouse Workspace, setting up sales order integration using this Connector Pack consists of the following tasks:
 1. Create new OpenSyncro Pipe for sales order integration.
 2. Configure OpenSyncro Pipe components: customize Procounter - Workspace field and code mappings. For example business information and invoice details of seller party.
 3. Schedule OpenSyncro Pipe to export data from Workspace webshop.

Default mapping in XSLT

The following list shows the default mapping from Workspace order values to ProCounter. Here are shown only the information that comes straight from order information by default.

More precise instructions about mappings and setting up constant values or/and building of business logic can be found from installation instructions.

Procounter	<-	Workspace Order
